Important Request to Amara Resource Purchasers:

Amara Publishing is not a large education conglomerate. It is a small group consisting of 4 public school teachers, 3 administrators and a graphic artist that teamed up and collaboratively created these resources. A tremendous amount of time, years of professional classroom work in both Title 1 and non-Title 1 schools, and extensive research went into the formation of Amara resources.

As every educator is acutely aware, classroom teaching requires a significant investment in time and preparation in both core lessons and lesson resources. The Amara educators that created these resources not only prepared for teaching in their classrooms but invested additional time away from the classroom to produce these resources as well. The purchase cost of any Amara resource does not yield a high profit margin. However, it is our hope and goal to provide quality resources at a low price per teacher and grade level, and that these curricular resources are effective for children's learning in all socioeconomic settings.

Piracy of copyrighted products is against the law, but there are ethical issues as well. If Amara resources are implemented at your school, please respect the Amara copyright and officially purchase the curriculum.

Thank you,

Introduction and Implementation – Bridge Resource

Thank you for purchasing an instructional product from Amara 4 Education.

This introduction is intended to:

- Enhance teacher understanding on the overall design of the daily resource
- Detail recommended implementation processes to increase student performance
- Provide strategies for efficient and effective pedagogy to heighten student numeracy in the classroom

Bridge Resource Design: *Fall and Spring Semester*

Both the fall and spring semester Bridge Resources consist of eighty (80) daily learning opportunities with a detailed answer key located at the end of the 80 exercises. These two resources provide a simultaneous review of content as well as a daily opportunity for students to solve application word problems. The grade level is indicated by a series of triangles, dots, circles or stars in the learning opportunity header. These symbols are used in lieu of numbers to reduce self-esteem issues of children receiving special education services working in a below grade level Bridge Resource.

The Bridge Resource has a two-fold objective - build grade level numeracy and support the daily core lessons as well as rectify prior grade level numeracy skill gaps. The Bridge Resource is specifically designed for students to acquire rudimentary mathematical operational skills from both a conceptual and physical mathematics perspective. Each of the 80 Learning Opportunities is divided into three sections:

PART 1 -- Numeracy Development
PART 2 -- Application Practice
PART 3 -- Reflection and Conceptual Understanding.

The daily learning opportunities are designed to sequentially build and provide a spiral review. Students are exposed to skills and concepts prior to engaging in the associated application process on a daily opportunity and are provided repeated practice on specific skills to ensure verification of mastery.

A *Skill Support Package* is also available for purchase at each grade level. These resource skill packets contain specific numeracy skills (and solutions) that provide additional practice as well as pre-requisite skill building practice in key numeracy areas.

Bridge Resource Implementation

The implementation and consistent daily use are key aspects to the overall performance of any system. A Bridge Resource is not an exception to this thinking. In addition to the core lesson, it is paramount that a daily learning opportunity be a structural and consistent part of the daily ninety (90) minute math block. Students master skills and applications if sufficient practice is provided. Conversely, students will not master skills that are not adequately practiced.

It is important to note that effective implementation of a Bridge Resource usually requires more time at the beginning of the semester to set up and establish efficient routines and clearly communicate teacher expectations. However, as students are consistently engaged in the daily process, the time required for a student to complete a single daily learning opportunity is significantly lessened within a few weeks

of implementation. With any pedagogy or instructional resource, the teacher must guide and hold students accountable to ensure quality engagement each day.

Prior to implementation, it is advisable and frequently less expensive for a local reproduction company to copy all 80 learning opportunities pages and secure the pages with a plastic binder that allows a 'daily student resource' to lie flat on a desk when fully opened. It is also recommended that the pages be reproduced on single-sided sheets. Doing so will allow students to use the corresponding blank page to neatly show their work in an organized manner – as conveyed by the classroom teacher.

When each student is provided their own bound Bridge Resource, a running record is created so each child's work history can be reviewed by a teacher, administrator or parent to provide documentation of a student's daily progress over time. Individually bound Bridge Resources also afford time efficiency in a teacher's daily routines since he or she is not required to make Xerox copies each day or distribute and collect papers. Students readily retrieve their bound Bridge Resource from their desk and independently engage that day's learning opportunity.

The **implementation recommendations** listed below are intended to maximize student learning and academic performance using an Amara Bridge Resource.

1. It is highly recommended that the teacher solves the learning opportunity for that day in advance, so they are aptly prepared for the exercise solutions and any pedagogical points to emphasize on each exercise. Therefore, the teacher must also have an assigned booklet.
2. When students are first introduced to this resource, teachers should model their expectations on the quality and specific organizational structure of student daily work. The primary grade level teacher may model these expectations with a guided practice for at ***least*** 8 to 10 separate learning opportunities. At that point, students may work independently via a structured setting – complete a numbered exercise in accordance with teacher expectations – stop – and check the problem together. A deliberate and clearly modeled implementation process ensures high quality, accountable student work.
3. An effective means to accomplish this task is to require students to draw a rectangular grid on the corresponding blank page and show their computations for each numbered learning opportunity exercise in one of the grid's boxes.
4. Once the students begin to work through each of the problems, the teacher should continue to monitor the completion of problems by:
    - Stamping or 'marking with a check' that the problem(s) are/is correct.
    - Providing corrective feedback on those that are incorrect. If a student has made a computational error, have them check the problem and complete again, correctly.
    - Annotating in his/her own teacher booklet any conceptual or computational issues students may be struggling with due to lack of understanding. This assists the teacher to determine specific exercises that must be modeled and reviewed. Also, refer to the ***Skill Support Package*** or to the Formative Loop Resource Library to select appropriate skill practice and direction.
5. This resource and process serves as a daily diagnostic tool. If the teacher observes students incorrectly answer a specific skill or application, it is a clear indicator of a lack of skill or application mastery/retention. A short mini-lesson or spaced repetition instruction for three or four days invariably remedies a previous skill deficiency.
6. Upon completion of your allotted time for a learning opportunity, teacher may decide to guide students through a think-aloud of 1 or 2 problems that were challenging for the majority of students.

Recommendations on Numeracy Development

The 80 Learning Opportunities can be completed in less than 15 minutes each day ***with*** heightened student numeracy in basic fundamental operations. One of the most important numeracy aspects that an elementary student must master to automaticity is the basic math fact operations in addition and subtraction. The vast majority of operations involved in elementary arithmetic is highly dependent upon a student's ability to efficiently apply math fact knowledge. Fortunately, nearly all primary-aged grade level students can master their basic addition and subtraction operations during first and second grades, but an effective procedure must be securely in place.

A highly recommended and inexpensive daily numeracy program that assists students in learning and mastering both math fact and processing math skills is *Formative Loop*. This numeracy program requires a daily 5 minute paper-pencil ***written*** assessment and the program digitally tracks each student's progress. The *Formative Loop* numeracy program is individualized for each student, but a teacher can account for each student's progress in real time. The *Formative Loop* numeracy program also possesses a math fact sequence mastery in manageable chunks of daily exposure until the student is adequately prepared to successfully complete mixed addition (or, subtraction, multiplication, or division) one-digit facts. Finally, *Formative Loop* offers a skill resource library that assists the classroom teacher with skill practice on almost any mathematical topic readily available for immediate download.

In order to aid students in mastering math fact operations and processing skills, specific numeracy skills are presented within the daily learning opportunities. Those support skill sheets are also included for extra practice as needed in a grade level ***Skill Support Package*** available for purchase on the Amara 4 Education website. Additionally, Amara offers free downloadable math incentives that are singularly designed to intrinsically motivate students to master their math facts. The website also provides free downloadable white papers on various instructional pedagogy.

If any educator has constructive criticism on what we can do better, please contact us at the email address on the front cover. We appreciate any and all feedback that our team of teachers and administrators can use to better serve the needs of our students.

Thank you,

Amara

Part 1 – Numeracy Development **TEKS**

1. Check Student Work for Quality – **NOTE:** It is recommended to train students correctly in making number strokes. **K.2B**
2. Check Student Work for Quality – **NOTE:** It is recommended to engage in student practice until number writing skills are mastered. **K.2B**
3. Check Student Work for Quality and proper formation of numbers. **K.2B**

Part 2 – Application Practice

4. **a.)** Given **b.)** 3 apples circled **c.)** 1 soccer ball circled – **NOTE:** Students can number objects **1.2C; 1.5E**

Part 3 – Reflection and Conceptual Understanding

Student Answers: **No.** Note: Explain to students that the meaning does not change. Different ways to write the same number. **K.2B**

Part 1 – Numeracy Development **TEKS**

1. Check Student Work for Quality – **NOTE:** It is recommended to train students correctly in making number strokes. **K.2B**

2. **a.)** 2, 4, 5, 8, 10 **b.)** 8, 9 **c.)** 2, 3, 5 **NOTE**: Students can use the completed number line to assist them. **1.2C; 1.2D**

Part 2 – Application Practice

3. **a.)** 5 **b.)** 2 – **NOTE:** It is recommended to emphasize the same number of objects on each side of = sign. **1.3B; 1.5E**

4. **a.)** three **b.)** four **c.)** six **d.)** nine **e.)** eight **f.)** seven **1.2C; 1.5E**
NOTE: Practice as needed, in short mini-lessons – especially with 'three', 'seven', and 'eight.' Place all words on math word wall.

Part 3 – Reflection and Conceptual Understanding

Student Answers: No. Not the same number of triangles on EACH side of the equal (=) sign. Emphasize what **equal** means. **1.3D; 1.3E; 1.5E**

Learning Opportunity 10

Part 1 – Numeracy Development **TEKS**

1. Check Student Work for Quality – **NOTE:** It is recommended to train students correctly in making number strokes. **K.2B**

2. **a.)** 1, 2, 4, 5, 6, 8, 9, 10, 12 **b.)** 1 **c.)** 0, 1, 3 **NOTE**: Students can use the completed number line to assist them. **1.2C; 1.2D**

Part 2 – Application Practice

3. **a.)** 3 **b.)** 1 – **NOTE:** Emphasize with students that addition/subtraction equations mean the same thing reversed. **1.3B; 1.5E**

4. **a.)** square (all sides are equal in length) **b.)** Given (two pairs of sides are equal in length) **c.)** triangle (3 sided polygon) **1.6D**
NOTE: Place polygons (and attributes) and vocabulary words on math word wall – refer with quick mini-lessons of spaced repetition.

5. **fewest:** rectangle of soccer balls. **NOTE:** Students should number objects (1, 2, 3 or 4) Write the final number in front of rectangles. **K,2D**

Part 3 – Reflection and Conceptual Understanding

Student Answers: a.) YES. Same number of objects on each side of = sign. **b.) YES.** Same problem in number equation as **a.)**. **1.3D; 1.3E; 1.5E**

Learning Opportunity 11

Part 1 – Numeracy Development **TEKS**

1. Check Student Work for Quality – **NOTE:** It is recommended to train students correctly in making number strokes. **K.2B**

2. **a.)** 7, 9, 11, 13, 15 **b.)** 2 **c.)** 5, 6 **NOTE**: Students can use the completed number line to assist them. **1.2C; 1.2D**

Part 2 – Application Practice

3. **a.)** 3 **b.)** 1 – **NOTE:** Emphasize with students that addition/subtraction equations mean the same thing reversed. **1.3B; 1.5E**

4. **a.)** rectangle (two pairs of sides are equal in length) **b.)** circle (NOT a polygon – no straight sides) **c.)** triangle (3 sided polygon) **1.6D**
NOTE: Place polygons (and attributes) and vocabulary words on math word wall – refer with quick mini-lessons of spaced repetition.

5. **fewest:** rectangle of flowers - 4. **most:** rectangle of baseballs - 5. **K.2D**
NOTE: Students should number objects (1, 2, 3, 4, or 5) Write the final number of objects in front of rectangles

Part 3 – Reflection and Conceptual Understanding

Student Answers: a.) No. Unequal number of objects on each side of = sign. **b.) YES.** 3 = 3 **1.3D; 1.3E; 1.5E**

Learning Opportunity 12

Part 1 – Numeracy Development **TEKS**

1. Check Student Work for Quality – **NOTE:** It is recommended to train students correctly in making number strokes. **K.2B**

2. **a.)** 6, 8, 10, 12, 16 **b.)** 5, 4 **c.)** 7, 8 **NOTE**: Students can use the completed number line to assist them. **1.2C; 1.2D**

Part 2 – Application Practice

3. **a.)** 5 **b.)** 2 – **NOTE:** Emphasize with students that addition/subtraction equations mean the same thing reversed.**1.3B/D; 1.5E**

4. **a.)** triangle (3 sided polygon) **b.)** square (all sides are equal in length) **c.)** circle (NOT a polygon – no straight sides) **1.6D**
NOTE: Place polygons (and attributes) and vocabulary words on math word wall – refer with quick mini-lessons of spaced repetition.

5. **fewest:** rectangle of spoons - 6. **most:** rectangle of forks - 7. **K.2D**
NOTE: Students should number objects (1, 2, 3, 4, 5, 6 or 7) Write the final number of objects in front of rectangles

Part 3 – Reflection and Conceptual Understanding

Student Answers: No. It does not matter. ***Commutative Property of Addition*.** Introduce addends and sum math vocabulary. **1.3D; 1.3E; 1.5E**

1. **a.)** 2 **b.)** 2, 2 **1.3B; 1.3D; 1.5E**
2. 3: Given; 4: addend; 7: sum **NOTE:** Stress vocabulary – word wall – Students should learn correct vocabulary **Vocab.**
3. **a.)** 8, 9, 10, 12, 13, 14, 17 **b.)** 7, 6, 5 **c.)** 8, 9, 10 **NOTE:** Mini-Lessons on number sequences, as needed. **1.2C/D**

Part 2 – Application Practice

4. **a.)** rectangle **b.)** circle **c.)** square **1.6D**
5. 12 **NOTE:** Students should number each soccer ball to count correctly and practice counting. **1.2C; 1.5E**
6. **Ring** the school bus. "**X**" on the race car. **NOTE:** Students can use their hand as a tactile tool to help discern right from left. With their **left** hand, extend the index finger upward and stick out the thumb with palms facing **away** from body – an "L" is made – for **LEFT** – as a capital "L" is written. Right hand doesn't work. **K.2B**
7. **Fewest:** Rectangle with 4 dots; **Most:** Rectangle with 7 dots. **NOTE:** Students count and write numeral for total dots on diagram. **K.2B**

Part 3 – Reflection and Conceptual Understanding

Student Answers: Yes. *Commutative Property of Addition*. Show that the addends can be switched with dots or squares. **1.3B; 1.3D; 1.5E**

Learning Opportunity 14

Part 1 – Numeracy Development **TEKS**

1. **a.)** 3 **b.)** 2, 4 **1.3B; 1.3D; 1.5E**
2. 5, 3: addend; 8: sum **NOTE:** Stress vocabulary – word wall – Students should learn correct vocabulary **Vocab.**
3. **a.)** 7, 11, 13, 14, 15, 18 **b.)** 14, 15, 16 **c.)** 7, 6 **NOTE:** Mini-Lessons on number sequences, as needed. **1.2C; 1.2D**

Part 2 – Application Practice

4. **a.)** square **b.)** triangle **c.)** rectangle **1.6D**
5. 20 **NOTE:** Students should number each baby duck to count correctly and practice counting. **1.2C; 1.2E**
6. **Ring** the airplane. "**X**" on the banana. **Box** the car. **NOTE:** Students can use their hand as a tactile tool to help discern right from left. With their **left** hand, extend the index finger upward and stick out the thumb with palms facing **away** from body – an "L" is made – for **LEFT** – as a capital "L" is written. Right hand doesn't work. **K.2B**
7. **Fewest:** Circle with 8 squares; **Most:** Circle with 10 squares. **NOTE:** Students count and write numeral for total squares on diagram. **K.2B**

Part 3 – Reflection and Conceptual Understanding

Student Answers: YES. Equal sign in equations is *independent* of direction. **Recommendation:** Write the equation vertically**.** Ask students if the equation is still equal or correct. Write the equation upside down. Ask students the same question. **1.3B; 1.3D; 1.5E**

Learning Opportunity 15

Part 1 – Numeracy Development **TEKS**

1. **a.)** 3, 6 **b.)** 4 + 2 = 6 **1.3B; 1.3D; 1.5E**
2. 5, 5: addend; 10; sum **NOTE:** Stress vocabulary – word wall – Students should learn correct vocabulary **Vocab.**
3. **a.)** 15, 17, 21, 22, 23, 26 **b.)** 17, 19, **c.)** 19, 18 **NOTE:** Mini-Lessons on number sequences, as needed. **1.2C/D**

Part 2 – Application Practice

4. **a.)** circle **b.)** triangle **c.)** square **1.6D**
5. 15 **NOTE:** Students should number each triangle to count correctly and practice counting WHILE writing numbers. **1.2C; 1.5E**
6. **Ring** the daisy. "**X**" on the swimming pool. **Box** the rose. **NOTE:** Students can use their hand as a tactile tool to help discern right from left. 6. Given; **3** tens = **30**; **7** ones = **7** **1.2B**

7. **2**; **NOTE:** Making 10 is a tremendous numeracy skill in a Base 10 system to master. **1.3B; 1.3D**

8. **1**; **1** + 3 = 2 + 2 **1.3F; 1.5E; 1.3D**

Part 3 – Reflection and Conceptual Understanding

Student Answer: **addend**: 4; **addend**: 5; **sum:** 9; Students can write the addition equation, if needed. **Vocab**
